North-East Quartile 1
45.19%
Highest Risk Rate

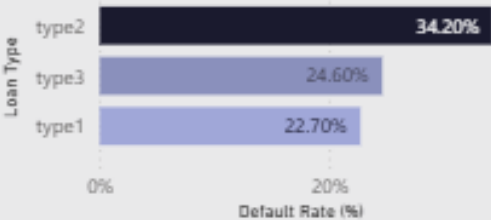

KEY FINDINGS:

- Loan Type 2 has 34.2% default rate — 50% higher than Type 1 (22.7%)
- Income is the strongest predictor: Q1 borrowers default 85% more than Q3
- Geographic + Income interaction critical: North-East low-income borrowers have 45.19% default rate vs North high-income at 16.98%
- Credit scores matter, but income/region are more predictive

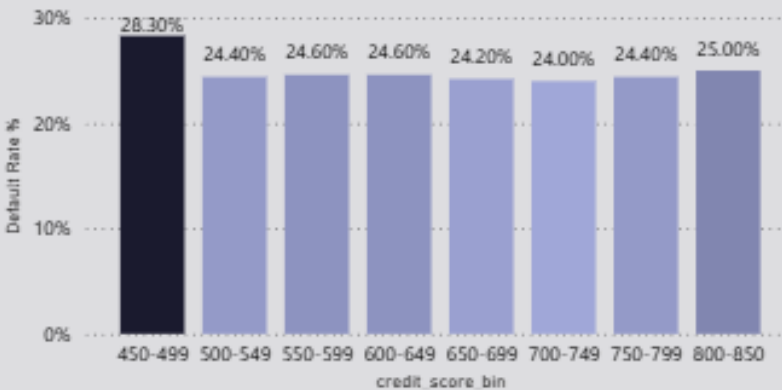

Default Risk Matrix: Region vs Income

Region	1	2	3	4
North-East	45.19%	26.30%	20.74%	28.25%
central	40.35%	26.72%	21.26%	20.84%
south	36.33%	26.10%	20.67%	22.40%
North	32.81%	22.00%	16.98%	17.83%
